HYDRAULIC PROPS

Hema hydraulic props are so important components that affects working confidently in mines. It is easy to operated and keep maintained them. It is possible to get different prop lengths with some standart extention pieces The working of a prop is provided by a conclusion of forwarding the fluid, which is in emulsion status and generated in a central high-pressure pump unit, to the prop.

That changings of the lengths of the props by their stroke and lengthen parts provide an easiness for locating them according to the thickness of the coal layer. Extention - Pieces are also easy to put off/on in the mine gallery as well. It is 40 ton for the single stroke props type2-type8, and it is 30 ton for the double stroke props type9-type12. We have also got additionally our main product hydraulic Props;

- Roof support,
- High pressure unit,
- Chained conveyor,
- Band conveyor,
- Monorail carrying system,
- Reductors,
- Cooli-Car conveyor pushing cylindir,
- Conveyor chain strethcing cylindir,
- Signalization and communication system,
- Ceiling pressure measuring equipment.
- No result has been found.
